

Hybrid Hydro Mitter™

High-pressure washing and soft-touch cleaning both have their place in a tunnel car wash. And with Belanger's Hybrid Hydro Mitter™, that place can be the same six feet of tunnel space.

Engineered to fit in just 72 inches, the Hybrid Hydro Mitter combines the cleaning action of a three-rack side-to-side mitter with the washing power of 26 oscillating high-pressure nozzles. Ten of these are 'fixed jet' nozzles that augment the mitter's horizontal and vertical surface cleaning. The other 16 nozzles make up four self-driven spinners that target the lower third of the vehicle, including wheels and rocker panels.

Because operators rely on the Hybrid Hydro Mitter to do so much, it's built for dependable operation and maximum uptime. Its single 2-HP drive uses an epoxy-coated wet environment motor to oscillate both the mitter racks and nozzle arrays. This simple, rugged configuration eliminates hydraulic maintenance requirements, while the system's single grease point is designed to be lubricated just twice per year.

Hybrid Hydro Mitter™

FEATURES & BENEFITS

Powerful 2-in-1 Cleaning Component

Which uniquely combines high-pressure cleaning with an overhead mitter for effective cleaning results

Overhead Mitter Cloth

Used alternating, full strokes to provide a unique "SNAP" cleaning action that results in consistently cleaner vehicles

Precision Milled Nozzles

Create the perfect spray patten to blast away overhead dirt and debris from the tops of vehicle surfaces

Built-In Rocker Cleaning System

Which consists of 4 high-pressure spinners, precisely target the rocker panels with the ultimate in high-pressure washing effectiveness

Dual Cleaning Features

Provide a full range of oscillation for total vehicle coverage

Minimal Space Requirement

This powerful cleaning component only requires 6' of tunnel space

REQUIREMENTS

Physical Examples

Tunnel Space Required 6'
Component Height 11'
Component Width 12' 6"

Vehicle Height Clearance 7' 5"
Vehicle width Clearance 9' 7"

Utility Examples

Electrical 3-Phase 208/240/480 VAC
Water: High Pressure (2) 1" feed @ 18 GPM @ 1000 PSI
Water: Mitter (1) 3/4" feed @ 8 GPM @ 40 PSI minimum
