BELANGER, INC.

BELANGER 

Belanger transformed the way the world washes vehicles—and has led the industry ever since. Whether you're a seasoned operator or a first-time investor, the equipment you choose can greatly impact your success. While the initial price matters, what really counts long-term is how reliably your equipment performs day after day. Downtime can quickly erase any upfront savings, while reliable, low-maintenance equipment pays for itself many times over, increasing your revenue and lowering costs.

Inspired By You. Built By Belanger.

Your equipment should also support your unique business model and serve both your operation and your customers well. Reliability and performance don't happen by accident—they're the result of careful design and meticulous craftsmanship. At Belanger, we help vehicle wash operators succeed, one at a time, because that's our measure of success.

If you're building a vehicle wash, there are plenty of equipment suppliers. But if you're building a business, start with Belanger. As a full-line manufacturer, we offer more types of washes than anyone else—so we'll recommend what's best for you, not a one-size-fits-all solution.
